

VANQUISH 340 Metal Detector

255539

Minelab Vanquish 340 multi-frequency metal detector with Multi-IQ technology, 3 search modes and waterproof V10 Double-D coil. Lightweight, collapsible, turn-on-and-go.

Colour

PRODUCT DETAILS

SIMULTANEOUS MULTI-FREQUENCY
The Vanquish 340 combines the power of multiple detectors into 1. Equipped with our revolutionary Multi-IQ technology, it automatically employs 5 frequencies at once so you can search all metals, all soils, all the time.

TURN ON & GO
No need to choose frequencies or ground balance. This metal detector auto-selects the best settings depending on your soil so you can simply switch on the easy-to-use, water-resistant interface and start detecting.

3 SEARCH MODES
Easily select from Park for high-trash recreation areas, Field for fine coins and artifacts or Beach modes — each with unique target separation and depth abilities (Coin, Jewelry, All-Metal) — to focus on target types or ground conditions.

LIGHTWEIGHT & COLLAPSIBLE
The Vanquish 340 weighs only 2.6 lbs (1.2 kg) and packs down to a mere 30 inches (76 cm) with a unique collapsible snap-lock system so you can throw it in your backpack and go.

AUDIO CONTROL
Automatic noise canceling, lag-free audio response and 3-volume settings put you in complete control of your search.

INCLUDED V10 COIL
Highly versatile and waterproof, the VANQUISH 340 comes with Minelab's V10 10"x7" Double-D coil as standard.
